MUSICAL ADVENTURES: SING & MOVE BY:

**CHICAGO SCHOOL
OF MUSICAL ARTS**

Welcome to a delightful journey of melody and motion crafted just for kids! In this playful and interactive class, children will explore the world of music and movement through age-appropriate tunes and fun movement activities. Our goal is to spark creativity, boost confidence, and instill a love for music and expression in young hearts. Join us for a joyful experience where music and movement come together in a dynamic and child-friendly atmosphere, fostering a sense of rhythm and happiness for our little ones!

SUPER SOCCER STARS

BY:

SUPER SOCCER STARS

Soccer Stars teaches soccer skills in a fun, non-competitive, and educational environment. Through an age-specific curriculum, soccer is used to nurture, build self-confidence, and develop teamwork. Low child-to-coach ratios and positive reinforcement ensure that each child improves at their own pace. Activities are presented using imagery relatable to children at this age to support learning about the body and ball awareness. The primary focus of each class is to introduce physical activities, rich language exposure, and movements such as running, hopping and jumping. Classes include fun dribbling and shooting activities to teach positive social interaction and the basic skills of soccer!

WHIMSICAL WORLDS & MAGICAL ART BY:

YOUNG REMBRANDTS NORTH ORANGE COUNTY

In this class, students will design their own magical universes filled with expressive characters, mythical creatures, enchanted forests, floating cities, and other fantastical landscapes. Each week, young artists will explore a new theme—such as magical portals, talking animals, or dreamy skies—while learning essential art skills like character design, perspective, shading, and more. Using materials like watercolors, markers, colored pencils, and pastels, students will blend storytelling with visual design to bring their fantasy worlds to life.

MAKERS CLUB

BY:

NEXPLORE

This exciting engineering program inspires students to pursue futures in science and technology. While working with Maker Kits, students build mechanical, artistic, and engineering skills and learn to act as inventors in their own right. They design remote-controlled hydraulic arms, learn to harness energy to power race cars, and experiment with structural design. Students keep their inventions and proudly share their projects with family and friends.

TGA PICKLEBALL

BY:

**TGA OF NORTH
SAN DIEGO**

TGA is excited to introduce Pickleball, the fastest-growing sport in the US! Similar to tennis, this is a fast-paced, ultra-fun, and highly accessible sport for all ages. With classes held right on campus, we teach the fundamentals using real equipment (all provided) and allow students to learn through interactive games, drills, and matches. Students will also explore relevant academic concepts through gameplay while putting into practice life skills such as sportsmanship, integrity, & perseverance. With a low student-to-coach ratio, TGA creates a safe environment & allows for individualized attention.

STEM ESCAPE RACE!

BY:

BRAIN CHASE

Join the after-school adventure where science, technology, engineering, and math collide with codebreaking, mysteries, and nonstop fun! Each week, your team will tackle a new digital STEM-themed escape challenge—solving puzzles, cracking codes, and completing hands-on challenges to climb the Leaderboard in a race against neighboring schools.

From dodging meteors on a Moon Base to stopping a museum heist with AI to breaking WWII codes on the Enigma Machine, every mission calls for sharp problem-solving, teamwork, and plenty of laughs along the way. Explore themes like Artificial Intelligence, aviation, oceanography, physics, outer space, engineering, algebra, and more—all designed by Harvard grads and Hollywood filmmakers.

Do you have the STEM skills—and the speed—to escape before the clock runs out?

POTTERY BY:

NEXPLORE

Nexplore Pottery offers a unique outlet for young artists to sculpt their ideas into one-of-a-kind creations, fostering self-expression and building confidence. Students learn to use their hands and sculpting tools to create pottery staples and imaginative projects like pinch pot monsters, pottery pets, and their favorite characters. As they sculpt and paint, they develop transferable artistic skills such as conceptualizing, sketching, and refining their designs. Manipulating clay helps students understand that they can change something with their own hands and influence the outside world.

LEGO ROBOTICS

BY:

**SYLVAN LEARNING
OF ENCINITAS**

Our Sylvan LEGO Robotics program offers fun, hands-on experiences that get the kids excited about the world around them. Students use a LEGO Wedo 2.0 kit and Ipad app to build and code robots. Explore essential science concepts that encourage teamwork, critical thinking skills, and an early love for STEM.

STEM Learning: Enhances understanding of science, technology, engineering, and math concepts through practical application.

Teamwork: Promotes collaboration and communication as students work together on group projects and challenges.

Critical Thinking: Develops problem-solving skills and logical reasoning as students troubleshoot and optimize their robots.

Future Skills: Prepares students for future careers in fields like robotics, engineering, and computer science by building a foundation of technical knowledge and creativity.
